## Kissinger hints at progress after day of talks with Smith

BY BRIDGET BLOOM: PRETORIA, Sept. 19

SUGGESTION

BY BRIDGET BLOOM: PRETORIA, Sept. 19

The possibility of a U.S.-sponsored settlement of the Rhodesian crisis hung in the balance to-night as Wr. Ian Smith, the Rhodesian Premier, and Dr. Henry

MR. JACK JONES' suggestion at the week-end that a supparently centred on Dr. Nyerere of Tanzania, in what reason for meeting Dr. Kissinger

BY BRIDGET BLOOM: PRETORIA, Sept. 19

Chilon of Seamen will be decided to-day at a meeting of the 40-member general policy committee of the General Council of British Shipping. The feeling among ships.

They apparently centred on Dr. Nyerere of Tanzania, in what reason for meeting Dr. Kissinger allowed by the TIME.

the balance to night as Mr. Ian Smith, the Rhodesian Premier, and Dr. Henry of the second separation of the sevent states of the second separation of Mr. and the weekend that a capital lary he phased an all capital lary he phased as all capital lary he phased to the season state of the TGWU also warned the say in an unerview in a margins to rise too steeply at make British intelligence the sent to Ircland "to make British withdrawal from a British sappeared on the verge of stance victory carry in-duck to the sex of the British withdrawal from a British B

## Seamen's prepare pay offer

By Ian Hargreaves, Labour Staff The final shape of the ship owners' offer to the National as requested by the TUC, a "constructive" approach in its offer, a period of hard bargaining lies ahead, especially if Left-wing members of the sea-men's executive are successful in keeping demands for a cush payment for "captive time"

not actually working) at the centre of the negotiating stage. The employers' offer will be pul to the seamen to-morrow. If agreement is impossible, the threat of a national strike from next Monday still applies. On the other hand, if the NUS executive accepts the terms of the offer, it has the power to call off the strike without recourse to a second hallot of members.

(hours scamen are forced to spend on hoard in port when

The main lines of the ship-owners' offer were established at a meeting of the shipping conneil's industrial relations policy committee on Friday. The implications of the fringe henefits approach to the seaman's problem are expected to be discussed at to-day's TUC-Labour Party liaison com-

There is anxiety in some quarters that any settlement could lead to a surge of similar fringe claims, even though most unions seem to be taking the view at this stage that the seamen are only being offered improvements of kind which are included in the annual pay and conditions claims of most trade unions as a matter of

Behind the seamen's claim

Sadler's Wells Theatre

## Sandrina's Secret

This new addition to the English Music Theatre Company's creditable repertory is already mentioned—a scene that his beloved Arminda is pany's creditable repertory is already mentioned—a scene that his beloved Arminda is a largely superficial character, in more ways than one anticipardinicra, in an English pates Figaro. Here Bruno Santin's simple, elegant topiary set? Though the British record for though the British record for the performance of Mozart's with a recognisable house style) operas gives no cause for shame, this one has been unaccountably neglected. There was a fringe performance in London not so long ago, but the work deserves to be more widely known and enjoyed. Mozart wrote it for Munich, where is was given in 1775—the period of the A major Symphony and the Violin Concertos. six years before idomeneo. He wrote it to an Italian text, but made a German version (Die gärtnerin aus Liebe), with spoken dialogue instead of secco recitatives, at an early stage.

Most of all one misses the with Ramiro role—considering that his beloved Arminda is a largely susperficial character, the finale ing that his beloved Arminda is a largely susperficial character, in the fact is psychologically interesting). The Arminda and Serpetta of Janet Gail and Meryi Drower were agrecably acted but too lightly voiced.

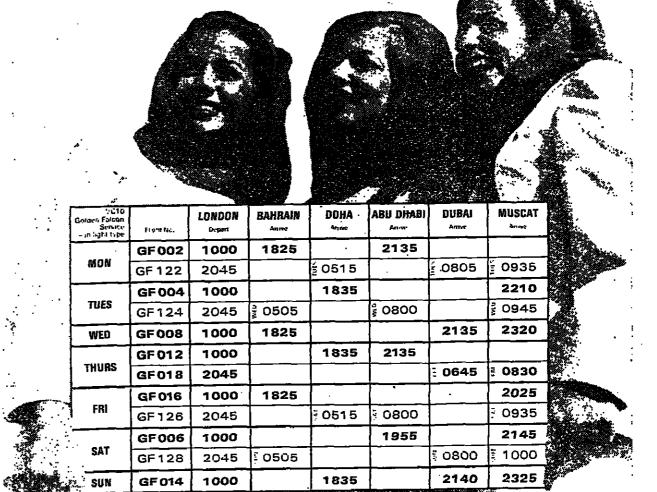

In 1775 Mozart's experience of the Mannheim orchestra (for which, when it had been transported to Munich, when it had been transported to Munich, when it had been transported to Munich, be was to write Idomeneo) still lay in the future. Yet he could already reveals Mozart very nearly fully sparingly used. Steuart Bedford, conductor of this revival, found the nerve of the music in things them as short and dramatically the wildness—the hadn't yet learnt to make them as short and dramatically the wildness—the willing as they became in the wildness—the willing solo bassoon in Sandrina's frantic cavatina tone of the succession of linked arias that precedes the

version (Die gartnerin aus Liebe), with spoken dialogue instead of seven recitatives, at an early stage.

For this reason, and because Mozart's own recitatives for the first act are lost, the EMTC is right to have used dialogue. Mr. Tracey's version runs fluently and makes the plot clear. I who appeared fully equipped for find that the occasional Cowardisms jar, but the audience liked them. The Marchesa Violante Onesti has been wounded by her suitor, Count neither curries the vocal guns for Belfiore. Whether the wound was mainly to her person or her pride is not terribly important, but it drives her to follow Belfiore, with revenge, capitulation, or both in mind. She disguised as Nardo, a garden-maid, and, with her faithful servant Roberto disguised as Nardo, a garden-boy, enters the service of the Mayor of a local

## Rail delays 'are not political' -Rhodesia

By Our Own Correspondent SALISBURY, Sept. 19. THE RHODESIAN Minister of Transport, Mr. Roger Hawkins, denied this week-end that the South African Government was trying to apply either open or covert political pressure on Rhodesia through its

railway system. •
He was commenting reports that the United States had evidence of South Africa deliberately congesting
rail link to the sea in
order to force Prime Minister
Ian Smith to accept majority

Mr. Hawkins sald in an interview that congertion arose from two sources. Following the closure of the Mozambique border with Rhodesia earlier this year, South African exporters lost confidence in the use of the diverted to Durban, which "tended to create an un-expected congestion."

"The other problem arises

from the fact that both our outlets to South Africa go through that system of the South African railways which is around the Witwatersrand."
he said. "Due to the recession that we have all experiencing, including South Africa, a number of products which normally would be consumed within South Africa are

now seeking export outlets."

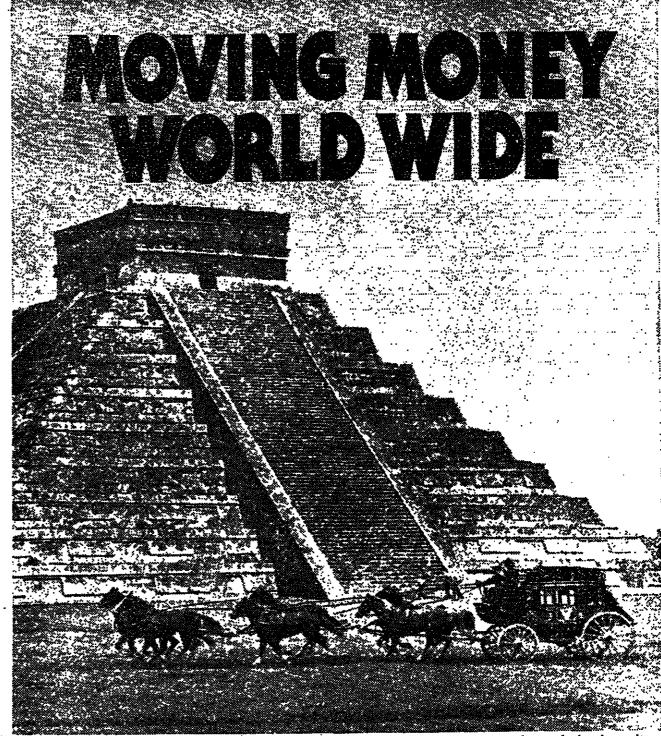

Meanwhile a white police man was killed and two others injured when their police launch on the Zambesi river was fired on from Zambia, security force headquarters announced on Saturday. The communiqué said that the policemen were in Rhodesian

## Pertamina dismissal

By Hamish MacDonald

JAKARTA, Sept. 19. PRESIDENT SUHARTO yester-day dismissed the head of Pertamina's shipping opera-tions, following new public disclosures last week of the extent of the Indonesian state oil firm's tanker problems.

The head of the Pertamina shipping and telecommunica-tions directorate, Colonel Sorkotjo, was "dismissed with honour and gratitude," according to a palace announcement. He will be replaced by the head of the telecommunications sub-directorate. Rear-Admiral

## **Good news** from Beryl A.

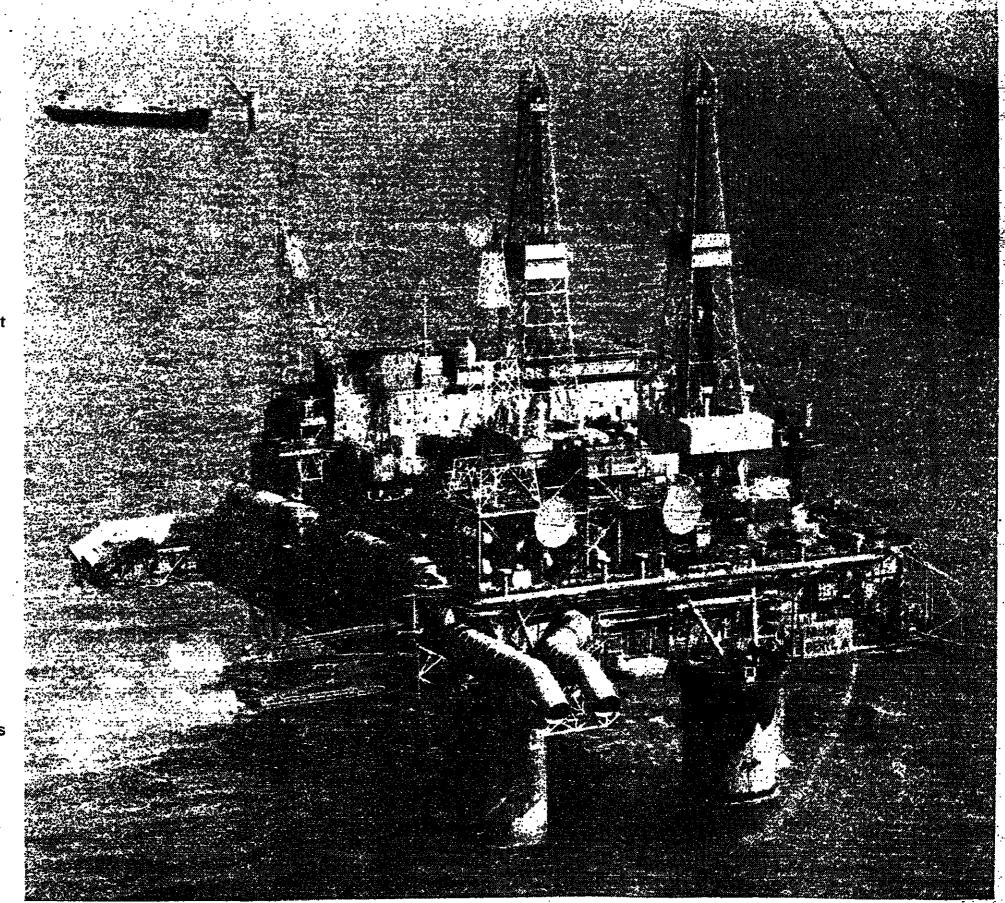

A newly-commissioned tanker loaded with North Sea oil has now left the Beryl A platform about 95 miles southeast of Shetland, bound for our refinery at Coryton on the Thames Estuary.

The tanker is pictured, top left, moored to a permanent loading buoy about one mile from the platform. Oil is pumped direct from platform storage via a seabed pipeline to the buoy, and thence to the tanker.

We and our partners have so far invested about £240 million in Beryl and we're continuing to spend at a rate of over £150,000 a day. Our people have put in a tremendous effort to make production from Beryl A possible.

We're pleased and we're looking forward to the time next year when we expect to be loading two tankers a week. Within three years Beryl should be producing nearly 5% of Britain's projected oil requirements - bringing the country measurably closer to the goal of oil self sufficiency by 1980.

Good news for Britain means a . continuing supply of quality Mobil products - and that's something for everybody to share.

**Mobil**

## COMPANY NOTICE

## **Hoechst Aktiengesellschaft**

Report on the first half-year 1976

The agreeable development of our sales during the 1st quarter 1976 has continued during the 2nd quarter both in Germany and abroad. Above-average growth rates were achieved in particular by the dyes, fibres and plastics divisions where the decline during 1975 had been especially sharp. Sales in the agrochemicals division, on the other hand, have shown a downward trend.

In a number of the German affiliated companies the growth in domestic sales has been appreciably higher than in Hoechst AG. Export business, however, has declined because of the special method of accounting employed for large-scale projects it has not yet been possible at Friedrich Uhde GmbH to quite equal the high average export figures of the previous year.

In spite of a number of adjustments, the price level of many of our products is still below that of 1975. In exports this is not least the result of considerable changes in the exchange rates vis-à-vis a number of the main countries importing our products. Capacity utilization in our production plants has risen from around 80% in the first months of this year to around 85% on average during the 2nd quarter. We hope that overall this utilization level can also be maintained during the second half-year, in which case it is to be expected that developments within the divisions will vary.

The higher sales in volume terms, suproved capacity utilization and the continuation of our effective rationalization measures have enabled us in spite of increased personnel costs resulting from the new collective wage agreements to achieve the same profit during the 2nd quarter as during the 1st.

Capital expenditure projects are proceeding on schedule.

## Road users urged to lobby MPs

ALL ROAD users should send their views to their MPs to eusure that their interests do not go unnoticed before Britain's future transport policy is finalised, said Sir Clive Bossom, chairman of the

Royal Automobile Club. Writing in the RAC's annual review of its public affairs activities — "Protecting the Interests of the Motorist"—Sir Clive points out that road ex-penditure has already been the target of cuts by successive governments, but that many attempts by national and local governments to raise the already high cost of motoring had been vigorously and suc-cessfully opposed by the Club. "Equally important is the

need to persuade the Government to provide more benefit to road users in return for the inimense taxes they pay especially at a time when sucture have delayed construction of so many urgently required new highways."

Saturday, disabled drivers, augered by the Gov-ernment's decision to phase out invalid tricycles without a alternative, satisfactory were asked to start a campaign to seek public support for their demands. Delegates at the annual conference of the Disabled Drivers' Association at Esset University were asked to collect 6m. signatures for petitions to the Government.

## Precautions which make air travel comfortable

IN MY PREVIOUS article I

**EXECUTIVE HEALTH** 

As most people fly these days, ates during the year in question discomfort as possible before, during and after the journey. Some people have a fear of fly-ing (grandly termed aerohodophobia) and I see a remarkably high number of them each year. Although the safety-record of most airlines is excellent, such knowledge in no way reduces the mental torment of the sufferer before take-off and landing. As a veteran pilot of too long ago I yet have sympathy for such people and have not forgtten the old RAF aphorism:

"Fools and birds fly by day, But only fools by night." It is useless telling these night. any origin.

## Time for the EEC to look ahead

THE EEC's return to work after reluctant to get to grips with the summer holidays should get any but the Community's most off to a good start to-day with short-term problems. In this the formal signature of the con-climate it is hard to foresee vention providing for the direct success for Dutch efforts to drum Transport election of the European Par- up agreement on a major step liament—almost two decades forwards towards political since the idea was first endorsed integration at The Hague by the Treaty of Rome. The summit scheduled for the end Everyone in the specialist motor must be a few extra percentage move, after years of French of November. opposition, and, more recently. This unwillingness to face remembers Dennis Blake, the for what is already a £100m, a British foot-dragging, can only be welcomed by all those who ing in view of the fact that the want to see a more integrated and democratic Europe. The aim must now be to ensure just embarked on a course that the first elections are held could well lead to far-reaching and finished up in the early sumon schedule in the early summer of 1978, and that they are a success. It would be unfortunate, so say the least, if voters were to stay away from the polls in large numbers through

## Fisheries policy

to be much other good news ten, eleven or twelve. The management disagreements and from Brussels in the coming general reaction to Mr. Tinde fell from the public eye. months. There is little sign of mans' oblique references to a progress in such potentially important areas of Community simply been to pretend that no abandon Burmah and go back to progress in such potentially important areas of Community been to pretend that no
activity as the regional and such danger exists—despite the
nergy policies or of any major, fact that the entry of further conergy policies or of any major, fact that the entry of further ponents business, Merritt and

# We can help you get the 'inside track'

Since 1899 the Royal Bank has been helping companies outside of Canada acquire the inside track in Canadian trade. In that time we've made it our business to know Canada, its people, regions, resources and markets. So we're able to put you in touch with the right people to help make your trade easier.

Should you have import/export business with Canada we're able to help you with the business basics on licensing, customs regulations, tariffs, financing

and other valuable information. We even have a book called "Businessman's Canada" which tells you most of what you need to know. (A request on your corporate stationery will speed your copy to you.)

Contact a Royal Bank representative in one of the cities listed below.

You'll find out why we're known as the helpful bank, and you'll find that our track record on trade just might help you set a few records of your own.

And, as is scrutiny of the operation of There are probably two main normal with this kind of regureasons for the general acceptability of the proposals, apart also have to satisfy itself that from the deposit insurance of their management is honest. the deposit insurance their management is honest, banks (at least until they have minimum capital and reserves and suitably qualified to undertake the kind of business which they intend to conduct."

two-tier system. The Bank will cial community. And generally on the Bank. be able to grant a new statutory recognition as a bank to certain deposit-taking institutions. This recognition is expected to apply coverage is still rather smudgy Outside this area there at the edges—and will include

Recognition will have the conferring banking status. They effect of exempting the instituwere based on differing criteria tion from the licensing require-

probably the most politically sensitive aspect of the proposals, and there is clearly scope for extensive debate about its details. But perhaps the most outstanding feature of the reaction has been the wide degree of acceptance commanded by the White Paper's other fundation. The legislation, there is no doubt, will represent a land.

The new proposals, building reform is the establishment of aspects on which the institutions compete for bank. And there is a strong deposits, and there is a strong deposits of the competency of a mandatory and comprehensive tions feel more discussion is deposit. If it is inevitable that deposit protection arrangements should be set up, as seems probable to on the extent of the competency of the extent of the competency of the proposals, and there is a strong deposits. If it is inevitable that deposit protection arrangements and there is a strong deposits. If it is inevitable that deposit protection arrangements and there is a strong deposits. If it is inevitable that deposit protection arrangements and there is a strong deposit protection fund, which it is intended at present should be set up, as seems probable to on the extent of the coverage activities, will go far to it is intended at present should provide protection against loss of prudential criteria which will greatly prefer that they should be established for licensed in the form of guarantees. Thinking among the bank and finance houses is that it is intended.

One general point is the kind of prudential criteria which will greatly prefer that they should greatly prefer that they should be established for licensed in the form of guarantees. Thinking among the bank and finance houses is that it is insurance should probably the extent to which these will deposit. The legislation that they should deposit protection arrangements to the contributions of prudential criteria which will greatly prefer that they should deposit protection doubt, will represent a landmark in British banking history.

It will establish for the first

## Increased charges are still necessary

sonal customers of all the big rises of up to 50 per cent. still attract no charges at all, ing to rise. ranging from an estimated 60. per cent, or more at Barclays to ing pressure to rationalise the the banks. They became very charges. But the innovations upwards of 80 per cent, elsewhere. Nevertheless, the moves this year represented a sharp reversal of the cuts in charges introduced in the round of competitive price reductions which was a feature of the 1973-74

The reasons for the banks approaches to the Price Commission have been clearly enough explained. Running the personal current account is generally one of the more costly parts of a bank's operations, and while some element of subsidy may be tolerated because of the valuable current account funds which accrue as a result, the banks generally are un-bappy to see the level of charges fall too far out of line with the costs involved. This had clearly been happening, not only in relation to personal current accounts but on much of their other business as well.

### Frozen

Charges to personal customers had been held at their reduced levels for two to three years. For business customers, charges had been frozen under the Price Code since 1972 and in many cases had not been changed since the late 1960s, Similarly many of the specialised services offered by the banks on a fee basis were still being paid for at rates ûxed years earlier. Meanwhile, the costs of the banks had risen sharply. Explaining the increases at Earclays, for example, Mr. Deryk Weyer, the senior general manager, said the bank's operating expenses had doubled in a period of three years and were expected to rise by another 20 per cent. this year.

The situation, the banks argued, was bringing increasing pressure on their profits-with some services, such as the trust business, being run at a loss Moves to correct this problem began at the end of last year, when several of the banks gained approval to lift the charges made for some ancillary services. When Barclays then made its application for general increases in current account charges, it was quickly followed by the other big banks. And the rises are affecting husiness customers, who unlike the personal customers negotiate their harges individually, even more

### Flexibility

The clearing banks are probably not in the present climate dependent on wholesale funds to any great extent to support their ordinary domestic lending; the growth of their branch funds has been enough to take care of that. These markets are, however, a vital source of flexibility in meeting the substantial short-term fluctuations which can take place in the position of the banks.

markets has indeed contributed towards increasing these fluctuations. Big bank customers have become extremely sensitive to even small rate differentials, and as has been seen in the past couple of months considerable volumes of lending can be switched away from the clearing banks to other sources and back again in the short term. The banks' continuing presence in the wholecularly the spare short-term a continuing inflow of funds sale markets enables them

that limit, it charges 9p a time

for debit entries, with an offset allowance at 4 per cent. These illustrate the variations on the basic themes which exist among the big banks; and the differences are even more marked with the smaller banks. Both the Co-operative Bank and Williams and Glyn's have avoided any increases in their personal current account tariffs -though the latter has promised to maintain this situation only until the middle of next year—and both still offer free banking to all personal customers who keep in credit.

## Opposite

than the 8p charged for other and have evidently made a con running a service well below cost: for the smaller banks: which may reasonably hope to

## County Bank. Strength and flexibility in servicing the needs of industry.

These two qualities in particular characterise County Bank's approach to merchant banking.

Our strength comes from our own financial resources (assets currently exceed £450 million), and from our being part of one of the world's largest banking groups. Our flexibility comes from the close and responsive relationships we enjoy with clients ranging from major industrial and commercial undertakings to smaller, fastgrowing companies.

The result is a wide spectrum of expert services attuned to the

needs of the moment. A blend of independent, sympathetic advice followed up in most cases by fast, positive help.

Such help can include substantial medium-term loans for working capital or expansion, assistance with rights issues, takeovers and mergers, and investment management for pension and corporate funds.

At a time when the nation is striving for greater output and a bigger share of world markets, County Bank is playing an increasing role in helping industry on the road to success.

County Bank Limited, 11 Old Broad Street, London EC2N 1BB. Telephone: 01-638 6000.

A National Westminster Bank Group

## Organization of the Sparkassen, Landesbanken/Girozentralen in the Federal Republic of Germany

economically independent credit institutions. They are communal savings banks operated under public law. The business of a savings bank is directed by its managing board. Their tasks and activities are laid down in the articles, which allow the savings banks to do all usual banking business for their customers. Transactions for their own account are subject to some limitations to secure the deposits, e.g. savings banks are not allowed to acquire securities out of

The sayings banks offer all services of a modern banking institution. Their services are available to every private individual, every business enterprise and every local authority. The following are the most important forms of business transacted: the acceptance of all types of deposits, credit business of all kinds encouragement of the acquisition of personal property, settlement of cashless payment transactions and all other types of banking services, e.g. transfers to payees in Germany and abroad, collection of debts, bills and receipts, execution of cheque transactions and issue of cheque eards, purchase and sale of foreign currency and travellers' payment media caring for the need of customers in the field of foreign trade transactions:

At the end of 1975 there existed in Western Germany 700 savings banks head offices with more than 16,000 branches.

### Savings Banks Associations The savings banks of each federal state are united in regional

Savings Banks Associations. The tasks of the regional Savings Banks Associations are, among other things, to represent the common interests of the savings banks: to offer information and advice to the members of the Associations in all matters of savings banking; to train staff members of the savings banks and to further their professional education; to examine the handling of business and the balance sheets of the member savings banks. At the head of the regional Savings Banks Associations is the Deutsche Sparkassenund Giroverband in Bonn (German Savings Banks Association). It is the centralised representative of savings banks interests and corresponds to the savings banks associations on the regional level. It is the spokesman of the savings bank system in the public sphere and also to the Federal Government and parliament. Through its board and committees it influences the co-ordination of the savings banks and Landesbanken/Girozentralen, which are also its members.

### Landesbanken and Girozentralen

The 12 Landesbanken and Girozentralen in the Federal Republic of Germany are operating under public law, like the savings banks. The business is directed by a managing board and the general management is supervised by the board of administration.

The Landesbanken and Girozentralen are the central banks' of the savings banks. They act as clearing houses for the savings banks' national cashless payments. They hold the liquid reserves of the savings banks within their area of activity and effect the regional balancing of funds among the savings banks. Moreover, the Landesbanken and Girozentralen transact all customary banking business, e.g. granting short, medium and long-term loans to industry, commerce, trade and public authorities; in many cases they provide loans jointly with the local savings banks.

The Landesbanken and Girozentralen are entitled to make issues. They issue mortgage and municipal bonds in addition to security and stock exchange dealings the services provided by the Landesbanken and Girozentralen include

foreign business in all its fields. To an increasing extent the Landesbanken and Girozentralen participate in international money and capital transactions, and, in particular, in the business of international financing.

The Landesbanken and Girozentralen assist the savings banks in their foreign business, for which purpose the maintaining of relations with foreign banks is of particular importance. On the other hand, the extensive network of branches of the German savings banks organization is utilised by foreign banks through the Landesbanken and

The standard DM traveliers' cheques of the German savings banks organization issued by the Landesbanken and Giro-zentralen and the savings banks show as drawee, Deutsche Girozentralen-Deutsche Kommunalbank, Berlin and Frankfurt am Main.

### **Building Societies**

Along with the savings banks and the Landesbanken/Giroentralen there is a third group constituted by the 13 public building societies. These are institutions specialized in housing finance. Contractual savers with these building societies form their own capital which benefits in Germany from State premiums or tax relief. The building societies grant loans to their customers at favourable rates of interest with which to finance the building or purchase of their own home and land.

**Deposits and basic Capital Resources** 

In the Federal Republic there is a well-balanced structure of private commercial banks, co-operative banks and credit institutions operating under public law, with special and general functions. The biggest Group among the credit nstitutions operating under public law is that of the savings banks (Sparkassen) and of the Landesbanken/Girozen-tralen. Every single deposit in these institutions is fully backed by a public guarantee. The guarantor for the savings banks is the respective local administration. The deposits of the Landesbanken/Girozentralen are guaranteed by their owners, who are usually the executive of the respective Lands of the Federal Republic and the respective savings

The sources upon which the savings banks draw to set up their own capital is their net profit, after deduction of tax. The Lendesbanken and Girozentraleh draw their basic capital resources from the allocation of their profits to reserves and from the allocation of the guarantors, i. e. of the respective State Governments and of the regional Savings Banks Associations in those Lands of the Federal Republic. While the private banks are able to set up their own capital in different ways (issuing of new shares, participations) the savings banks are prohibited by law from doing so. The basic capital resources of the Landesbanken/ Girozentralen and of the savings banks are modest in comparison with that of the private banks.

But this is not detrimental to their business transactions because the guarantee provided by the cities, communities and states have a net worth function which cover the liabilities of the Landesbanken/Girozentralen and savings banks.

Day-to-day

and the Government's to supply record numbers of £800m. on September 10, more for money than they strategy. Great Treasury bills to help finance whereas well over fibn. was wished. The following week frequently bid for fewer bills looked like being even worse and in a move to improve their situation bids at the weekly bill tender were pitched at a level that would have increased MLR.

This was at a time when the authorities had no wish to see such a rise and they decided upon a course of action that had not been used since MLR replaced Bank Rate on October,

Only £450m. bills were allotted instead of the proposed £600m. and this kept the average rate of discount just below the level at which an interest rate rise would have been triggered. In a further move to help the houses out of their short-term difficulties very large official loans were made avail able for the following week at a

rate below MLR.
The success of the operation in some ways illustrates the ad vantages of the position of the discount houses within the present banking system. If the houses did not exist then pre sumably a large part of their work would be taken over by the clearing banks. The authorities have at present very close links with a relatively small but expert group, who obviously gain unique advantages from the system but in return are open to strong influence to go along with official policy. This works to the advantage of all concerned, but it may be that the interests of a much larger organisation, with more diversified spheres of operation, could on occasions, however rare, be at some variance with the authori-

Labour Party National Executive plans to nationalise the major banks-if it ever became Government policy-might put a completely different perspective on the houses' position in the banking system. It would be rather ironic if after surviving the problems of recent years, the houses future should turn on less than a handful of votes

## Our approach to ustrial finance, in broad outline.

When you want to know more about the financial services Forward Trust have to offer we won't just send you an anonymous leaflet.

We'll send you someone who can discuss your needs personally with you.

Someone who can look at your business with an expert eye and can help work out a financial package that's tailor-made for your requirements.

As a member of the Midland Bank Group, we obviously have wide experience in helping all types of industry.

With short and medium term loans ranging from a few thousand pounds right up to hundreds of thousands.

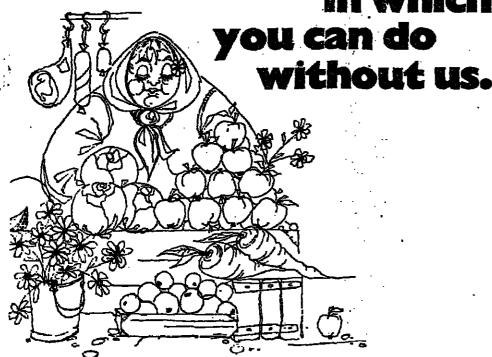

So the chances are we could help you.

If you would like more information simply complete the coupon above. And we'll put you in touch with our Regional Director

Alternatively, if you prefer, contact our local branch office-you'll find the address in the phone book. Either way, there's no obligation.

## Of course, here is a German market in which you can do

it there are other markets in which you nnot. Then you need a German bank

## Williams & Glyn's believes technology should improve personal service, not replace it.

Williams & Glyn's believes modern technology can be a good servant but a bad master. As far as we're concerned it should be made to provide the kind of traditional banking service people used to take for granted. In fact it sometimes enables us to give services that would otherwise be impossible. Automatic cash dispensers allow us to give a 24-hour cash service. And we can even give you an instant statement' at any of our branches - a record of your latest transactions and current balance.

But more importantly, modern technology gives us the time to deal more fully with your financial problems. In fact we devote more management time and effort to individual accounts than most other banks.

We don't claim any of these points makes us unique. But add them together and they amount to a big difference - a bank that looks at banking from the customer's point of view.

If you would like a bank that has more time for its personal customers, call in at your local Williams & Glyn's branch and ask to see the

Some of the other small differences that add up to a big difference

1 Greater accuracy

Before we send your computer statement. it is checked by hand at your branch against your old cheques.

2 A system that cuts queueing If a cashier is away, other staff can come forward to serve from the till at busy

3 High Yield Savings Scheme The Nest Egg Plan can yield up to 14.5 ". p.a. and includes life assurance.

4 Old cheques returned Your old cheques are returned

automatically with your statement to make it easier to keep track of your spending.

5 Quick decisions

The shorter chain of command at Williams & Glyn's ensures you of a quicker response.

## To Future Generations,

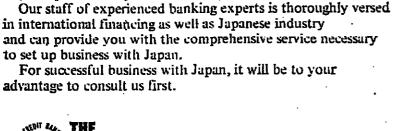

Social welfare is a subject of serious consideration in most modern societies. Man in the twentieth century accepts his responsibility to bequeath to the next generation a society better than his own. Daiwa Bank is not unique in accepting this responsibility, but Daiwa is unique in making acceptance of this role in society an integral part of their banking service.

Daiwa is the only Japanese city bank to combine banking and trust business. Daiwa is thus a fully integrated banking institution, comprising banking, . international financing, trust, pension trust, and real estate business. This integration is part of our effort to fulfil our social responsibility consistent with society's needs in a contemporary environment.

## We think the sooner you two meet, the better.

The Romans worshipped her. You don't have to go that far. But certainly Fortuna-

goddess of wealth and prosperity-is a very powerful lady to .have on your side.

First Fortune Limited adopted her as its symbol for the very obvious reason that the creation of prosperity is its raison

First Fortune is the United Kingdom subsidiary of the Commercial Credit Company of Baltimore U.S.A.-who have assets exceeding \$2,000 mand employ more than 8,500 people throughout the world,

With those resources, First Fortune has all that's necessary to meet your needs, whether you are an individual or a business or industrial concern.

Choose the services First Fortune offers:

### Banking

First Fortime operates a full range of normal banking services-everything from current accounts, cheque clearing, bank eards, personal loans, overdrafts, bills of exchange, bridging finance, revolving eredit, block discounting, commercial or fixed term loans, to financing U.K. exports.

### **Business Finance**

This takes another type of expertise. First Fortune have it-for plant and machinery finance, aircraft finance, marine, finance. Charges are always competitive arrangements. flexible, administration kept to the quickest and simplest.

### Leasing

Here is a dynamic and flexible tool which has an important role in most corporate financing portfolios. You select the equipment, negotiate purchase price, arrange delivery-First Fortune are involced and pay the supplier immediately after satisfactory completion of documents, receipt and acceptance of the equipment. Your remais are paid out of income-fully deductible for tax purposes.

### Consumer Finance

First Fortune are becoming better known each day to dealers and retailers throughout Britain, particularly in the motor vehicle field and increasingly in other areas that involve sales financing. Vendors of caravans, boats, furniture, central heating,double glazing,swimming pools-different products, different dealers, but all improving their positions in today's tough market place through First Fortune finance programmes.

## Specialised Services

The above is just a glimpse of the scope of First Fortune'sbanking and finance services.

You may well have a requirement that needs more particular research and imaginative planning than the regular serviceswe've covered.

First Fortune have the sensitivity and knowledge of financial markets to interpret frends and anticipate the future. Your needs will receive the closest attention and behandled with an authority and flair based on many years of experience both in Europe and the USA.

First Fortune have branches in most major towns and cities in Britain, recently moving their Central London branch to 21PalMallSW1.

Fortuna was consulted as a reliable oracle during contaries of Rome's dominant position at the centre of world trade and

In 1976, you'll find First Fortune not only reliable but a good dealeasier to consult.

## THE BANK OF NEW YORK

The brief advertisement below appeared on February 23, 1784, heralding the founding of New York's first bank -The Bank of New York.

And that date, significantly, was a year before the U.S. dollar was named the

official currency by Congress.
Throughout the years since then, the Bank has established an enviable record of quality, strength, integrity and personal service and these are the qualities on which the Bank still prides itself today.

Tappearing to be the disposition of the Gentlement in this City to establish a BANK on liberal principles, the stock to consist of specie only, they are therefore hereby invited to meet To-Morrow Evening at Six o'Clock, at the Merchants Coffee House where a plan will be submitted to their consideration

> from NewYorkPacket Jehrnary 23,1784

## Corporate-investment view undergoes change with economic modifications

The Japanese economy encountered a series of new period from 1973 through 1975. Outstanding among them was

the two-digit advance of prices that took place in the 1973-74 period and continued lingering into 1975, the oil crisis that broke out in the autumn of 1973. and the longest recession of domestic business after World War II that lasted from 1974 through 1975.

Reviewed briefly in this article is whether or not the business management concept of Japanese corporations has changed against such new backdrops with special reference to the corporate mood about capital investments. Recent investments

Shown in the accompanying graph are the trends of private inventory investments and private plant-equipment investments in the past 10 years. The trends of such investments in the process of the latest recession following the boom that closed in the fourth quarter 1973 (all calendar years) and during the recovery period in its wake are relatively noticeably different from the comparable trends in similar business transitions in the past.

In the phase of inventory investments, they continued to register a high level during the period from the first quarter through the fourth quarter of 1974 when the recession was in swing. This was the inventory investment performance particularly different from the past showings.

As a result, the inventoryshipment ratio made a con-

siderable increase in the latest recession period. Although the two-digit price advance, the oil events-virtually the first ratio has been gradually experience of the kind after declining in the current World War II-during the recovery period, it still has continued to stand at a level comfortably higher than the comparable performance under Japanese economy similar business circumstances

> In the phase of private plant and equipment investments, the tern following the two-digit slump has been extremely acute and tenacious over a long period. presenting a specific difference from the past

in the past.

The sharp and continuous slump of such corporate investments is taken to reflect directly the real state of the national economy and also to represent judgment on the part of corporations to determine the course of investments.

Taking this point into consideration, it may be said that the latest trend of corporate investments (that is, its difference from the past practices) reflects the judgement of corporations and the changing investment concept stemming from such judgment.

According to a short-range survey of major enterprises, the following two major trends have become conspicuous: 1) The level of inventories considered normal by corporations has become tangibly higher than that in the past; 2) The mood of production equipment surplus is stronger than justified by the real size of surplus equipment. Providing

background for the changing investment mood of curporations is the economic

Trends in Private Inventory and Equipment Investments

confusion resulting from the crisis and the acutest and longest recession after World War II. However, also considered responsible is the structural change of the

In the first place, the Japanese economy has shifted to the high-cost economy patprice advance and the petroleum price soaring. At the same time, the Japanese economy has begun to assume the pattern more tolerating to inflation as compared with the past. The corporate concept has changed accordingly.

· A representative example is the price outlook on the part of top corporate executives. According to the periodical survey of the business outlook by corporate executives, the ratio of such executives expecting the future rise of the prices of manufactured products continued to advance swiftly after 1973 and reached 72 per cent in November, 1973. However, the comparable

ratio later began to decline and stood at 39 per cent as of May, 1976 The outlook of the prices of raw and processed materials followed the same pattern, falling to 61 per cent in May, 1976 from the peak of 93 per cent in November, 1973.

However, the outlook of corporate executives about the price course of manufactured products still is bullish as the ratio of those expecting the price hike of manufactured products stood low at less than in per cent at peak before 1972. The bullish outlook of the future price course thus ap-

pears to have become generally

executives.

Second, the view that "the growth tempo of the Japanese become predominant among corporations following the oil crisis and the protracted phases: recession for around two years.

Different from a temporary change of the concept resulting from economic confusion, the conceptual change stemming considered to exercise a farreaching influence on the future course of corporate investments.

There are undeniably many factors determining the trend of corporate investments in tangible projects, and the conception is one of such factors. Hence, it may be erroneous to attach excessive importance to the conceptual change. Admitting this point. the future course of investments based on the corporate concept may be expected to fare:

In the phase of inventory

investments, the high level of the inventory-shipment ratio necessarily will not cause the standstill of such investments in the future as the high level of the ratio at present is only partially attributable to the conceptual change on the part of corporations. According to past examples, the trend of inventory investments used to change after an interval of two or three quarterly periods following the change of the corporate judgment on the course of inventories, regardless of the temporary trends of inventory judgment or inventory investments. In view of such past examples, there is possibility of inventory in the curb on plant and equipment vestments starting an increase in the near future.

In the phase of plant and equipment investments, the specific prescription for protracted slump of such in- averting such adverse developvestments has been largely attributable to the conceptual change on the part of corporations, and the future recovery of to take effective steps for such investments is bound to be perpetuating recovery by slow in view of the still strong mood among corporations about the surplus of production

Future Outlook The conceptual change on the

brought about such changes in the corporate investment behavior and will continue so inthe future as so far referred to. decelerate in the future" has. This gives rise to misgivings as to the future trend of the Japanese economy in the following

First. There is fear of the domestic business recovery inviting inflation. Corporations, desirous of disposing of heavy inventories at advanced prices, from the structural change of are likely to start moves for higher prices. At the same time. they also are liable to become cautious about plant and equipment investments in view of the uncertain outlook of domestic business

These two factors, separately or in combination, may create a situation in which the increase of supply capacity begins to fail to eatch up with the gain of demand, and the increase of demand is liable to invite the upswing of prices.

The second worry emanates from the foregoing developments in prospect. That is, if measures are taken relatively hastily for curbing inflation or if personal consumption expenditure may recede along with the progress of inflation, there is fear of the business recovery proving short-lived.

Assuming that a short-lived business cycle happens to start through the medium of inflation, it will directly serve to justify the changing concept on the part of corporations and eventually to rationalize the change of the investment bahavior based on the conceptual change. Corporations thus may be led to feel that the holding of high-level inventories was rational and that investments was justifiable. A vicious cycle thus will start.

There is conceivably inc ments. In the early stage of husiness recovery, it is considered particularly necessary adequately adjusting demand tincluding proper induction of plant and equipment investments) and curbing the advance of prices for preventing inflation Japan at present is standing at such a stage.

## Deposit-taking institutions

Deposit-taking institutions have come through rough times. with many falling victim to the secondary banks crisis of the years 1973/74. Among those hardest hit were some of the so-called "123" companies which, under statute, are exempt

from the Moneylenders Acts. They include those generally regarded as belonging to the fringe banking sector but also a number which technically fall into the "123" category but would not be regarded as

With the exception of, for example, Building Societies, the Giro and Trustee Savings Banks, all deposit-taking institutions, including the "123" companies, will need either a licence to practise or be recognised as a Bank. Under the terms of the recently-published White Paper, they will have to "comply

with certain general conditions laid down in the legislation

carrying on activities associated with the Secondary Banks.

and with published prudential criteria which will be dete mined by the Bank of England with the agreement of the Treasury.

We publish below an alphabetical table of British-owned and/or -based "123" companies excluding subsidiaries of authorised Banks, Clearing Banks and those which hold "127" or other recognition. From their latest available Balance Sheet we have extracted pertinent information that the Bank of England will examine when assessing their status-to-be--each company's figures can be viewed only in the context of its particular business activities, which vary from hire purchase to in-house banking.

Most are expected to qualify as licensed deposit-takers, but it is not yet certain how many will reach the standards required for Banking status.

## COMPANY NEWS + COMMENT

## Laird Group £0.5m. setback midway

THE WARNING given by the Laird Group that first half 1976 profits could be lower has been borne out. In the event they are £0.5m. down at £3.04m.

At the annual meeting in June, it was stated that the motor com-ponents business had shown sub-stantial gains, but a marked and rapid improvement was needed

in steel profits.

The interim dividend is raised from 1.18p to 1.31p net, payable November 29: and the directors intend to pay a final of 2.63p, which would compare with 2.39p.

The black sheep within BET

### comment

fusion, whose subsidiary Redifon produced record results, Advance Laundries, Boulton & Paul, where Laundries, Boulton & Paul, where Laundries, Boulton & Paul, where there was an upturn in profits after the substantial setback experienced last year, United Transport and Canadian Motorways.

The plant hire companies did well to maintain, under difficult conditions, particularly in the latter part of the year, the level of profits achieved in 1974-75.

Against the foregoing performances have to be set the losses which continued to be incurred by Murphy Bros. and Humphries haboratories is no overnight affair, while the losses at De Lan Murphy the U.K. operations at expected to return to profits the german subsidiary development programme.

The black sheep within BET diverse interests are yet to return the goods. Bot there with the goods. Bot thumphries and Murphy, which their combined loss last year was up to \$4.07m. Admitted their combined loss last year was up to \$4.07m. Admitted their conditions, particularly in the firm Laboratories is no overnight affair, while the losses at De Lan while the losses at De Lan while the losses at De Lan was the profits the graph of the profits the graph of the profits the profits the profits the graph of the profits the profits the graph of the profits the prof by Murphy Bros. and Humphries Holdings, and the cost of financing Wembley Stadium's building development programme.

There is evidence to show that Murphy Bros. is on the mend and it is expected that this year Humphries Holdings will register an improvement in its position.

Twelve months ago, particular attention was being paid to companies' cash positions and this led Sir John to comment on the satisfactory financial position of the B.E.T. Group.

The subsequent improvement in the position then outlined is reflected this year. Bank borrowings and loan capital at £80.6m. are £7.2m. less than at the end of the previous year. Against this indebtedness there is cash of £14.2m. (excluding £6.8m. held in Rhodesia), and general investments, virtually all of which are quoted securities, valued at Chairman's Statement Page 3

## Reports to meetings Letraset trading well

Mr. W. Fieldhouse chairman of no doubt that it would show Letruset International, told the good improvement over the fire annual meeting that the inter—in particular the export drivenational spread of the company's was showing good promise—by trading was a major contributor to predict the final outcome to last year's record results and it would be equally important as economies recover from recession.

Notion Estates—Remedia and the present year would be for the present year.

## Overseas lift for Skandia

By William Dulfforce

STOCKBOLM, Sept. 19.
SCANDIA, the Swedish insurance company, expects to improve the operating profit from its accident insurance this year to Kr.110m. (£14.4m.) from Kr.99m. in 1975, despite a loss on the domestic account of some Kr.130m. The income from capital operations is expected to rise by Kr.9m, to Kr.180m, but the most spectacular increase in earnings, from Kr.27m. to Kr.80m., is anticipated in the company's

international business.

Skandia's international operations have been expanding much faster than the domestic, especially in North America.

Premium income from abroad is expected to rise by 37 per cent. to Kr.1.8bn. (£235m.) this year, amounting for the first time to over half the company's total premium income on acci-dent insurance, which is fore-

cast to reach Kr.3.47hn. The forecast published to-day is based on the (unspecified) results for the first eight

## Now it's 'what happens' to Poseidon

BY LODESTAR

IN YOUR "Whatever happened to?" series on Australian stocks could you get around to Poseidon? This was the gist of Friday. So it is hardly an exciting some what I suspect to be tongue-in-cheek queries that reached me last week. One reader with a long memory even went so far as to say that, as I had probably written more words on this particular subject than anybody else, and "had even sometimes been right in predicting the course of the shares," who could be better qualified to give a verdict now? All I can say to that is, thanks.

Well, I must admit that nobody who preached caution in the great boom days was believed and indeed, as I well know, could even render himself highly unpopular. But the most rabid bear could. written more words on this particular subject than anybody elses and "had even sometimes been tright in predicting the course of the shares." who could be better the shares." who could be better to deal of the shares." who could be better to deal of the shares are only option is highly debatable.

Well, I must admit that nobody a Sydney broker with that classes the most hough the final word comes from the shares would bear could even the shares are only option money. But the most rabid bear could so thave foreseen, when desperately trying to close his position at over £100, the day when the shares would be under £1. But, enough of hindsight. The great question is what now? One thing seems to be fairly certain, Posseldon is broke, and could face receivership if lenders such as the Australian Industrial Development. Corporation eventually decide to foreclose. This, however, seems unlikely and indeed unnecessary.

Equally unlikely. I gather from Australia over the week-end. is that the much-rumoured bid for the company by Western Mining on a one-for-two share basis will ample of the shares will amprically the proposed shadowed here is the project. Utah Mining Australia or the company by Western Mining on a one-for-two share basis will amprical? Phelos Dodge with the citical would be a bold speculator that them the would be a bold speculator that them the would be a bold speculator that them that hould be a bold speculator that them doubled who would acrually buy the Australia mining sphere. This big column's stressing of the big column's stressing of the big column's stressing of the big column's direction is highly debatable, though them at this stage. True he spull them at this stage. True he spull them at this stage. True he spull them at this stage. True he would have the with the classifier and the Australia mining sphere. This big column's stressing of the big column's development and the Australia of the New South Water all. the New

And although it might conceivably be interested in the management contract for Queenstand would be open-pit or under wins they will have another shot met. This Poseidon "plum" is present, this Poseidon "plum" is present the property of the ground.

On Friday, Poseidon was 80p, after having touched 130p last pure for to the year's disastrous financial results being published and comparing with 55p when the listing was restored after the brief suspension of dealing. Only one adit. suspension of dealings. Only one broker has been bold enough to

the pace of investment in the interest. This is not likely to be industry's future. This brings us the end of the story.

Poseidon is broke, and could face receivership if lenders such as the Australian Industrial Development Corporation eventually decide to foreclose. This, however, seems unlikely and indeed unnecessary.

Equally unlikely. I gather from Australia over the week-end, is that the much-rumoured bid for the company by Vestern Mining on a one-for-two share basis will materialise. After all, why should it? Western Mining could obviously be interested in picking up the other half-share in the Windarra nicket operation at a knock-down price. But it would hardly want to extend its interest in the now closing-down Mount Charlotte gold mine on Kalgoorlie's once-famed Golden Mile, or take a stake in the loss making Burra copper producer in South Australia.

And although it might conceivable to the activity pas be interested in the management of that formerly exciting and to that formerly exciting. An interesting facet of the industry's future. This brings us the end of the story.

An interesting facet of the coldsworthy deal is that Utah discoveries, the north-western base-metal discoveries, the north-western base metal discoveries, the north-western been base metal discoveries, the north-western base metal for new inspection. An interest in the s

spect, this Poseidon "plum" is now regarded as having a question mark hanging over it. Also overshadowing the market in Poseidon shares is the outcome of Australian stock exchange inquiries into sales made before the final revelations about the company's strained financial circumstances were made.

Spect, this Poseidon "plum" is product the sale of the

Union Bank of Switzerland ments in the straight sector were to suisse is offering a fifteen year ma'urity. however as against UBS's five years.

An issue price of par and a conversion premium of between 97 and 10 per cept. are expected Partly no doubt because the UBS issue went to such a big premium in the after market and has continued to be quoted above par ever since, demand for the Crédit Suisse issue is high.

The Canadian dollar market The Canadian dollar market and a Can.\$60m, two-tranche issue offers are said to have borrowed \$7.0bm, and others \$26.7bm.

The Canadian dollar market The Canadian dollar market and indicated 9 per cent. for a first in the market.

Among recent issue outstanding corporation. Half the issue offers in the market.

Among recent issues, Denmark other half an indicated 9 per cent. for a first in discated 9 per cent. for a first in the market and 98. Macmillan Berlitz, priced 12 years and average life of 9.9 and 98. Macmillan Berlitz, priced 12 years and average life of 9.9 equipment and materials from the construction of a cement factory. Last November, Japan agreed to provide North

has continued to be quoted above par ever since, demand for the par ever since, demand for the construction of a graph ever since, demand for the par ever since, demand for the part ever since is a first form. In the part ever since of the part ever since is a first form and the part ever since of the

AS LAST week progressed, interest in the U.S. dollar sector was increasingly focused on equity or equity linked bonds. The major announcement of the week was Credit Suisse's long-heralded S100m, convertible. But Japanese companies have also continued active with the announcement of two further equity issues to follow Friday's closing of Taisho Marine and Fire Insurance Company

shares on Friday.

The two new issue announcements has cent. and an issue price of 99!. hetped the issue through the sum of period. Few expected a composite list of publicated Deutsche Bank to shift from the Eurocurrency credits through indicated pricing of par on the invo shorter tranches and 99! on the fifteen-year bonds.

Approval for the latter issue of the latter issue of the sonly just been given and it is not expected in the immediate years offers an indicated \$\frac{1}{2}\$ per cent. and the other of \$10m. for \$60.75m. developing for the Eurobond market Credit Commercial de France is countries and organisations for Fire Insurance Company

The terms of the Credit Suisse recovered considerably the end of last week, not least the current quotes for the issue because of new issue announce.

Union Bank of Switzerland in general, the U.S. dollar 12 years an indicated 8; per cent. Socialis countries and organisations for the countries and organisations for issue developing countries and international organizations for \$14.0bm. Among the developing countries the oil exporters are said to have borners. izations for \$14.0bn. Among the developing countries the oil exporters are said to have borrowed \$7.0bn. and others \$26.7bn.

### **VON ROLL SEES IMPROVEMENT**

ZURICH, Sept. 19. The Swiss engineering concern Von Roll expects to return to profits in 1978, according to the recently - appointed managing director Mr. John Wohnlich. The group, whose turnover dropped sharply from Sw.Fr.890m to Sw.Fr.694m. in 1975. expects a further "substantial" loss for the current year however.

In 1977 the company anticipates a positive cash-flow-in;

1975 negative cash-flow was of an unconsolidated Sw.Fr.13m.—and in the following year an actual

net profit.

The company, which recently announced a reduction of its work force by 350, now definitely intends to close down its rolling mill in Gerlafingen for medium, and fine profiles by the end of the year production of cold-rolled sections having been passed on to the French group Profilation in exchange for a participation in the latter company's Swiss sales subsidiary Profilform.

### **ROYAL DUTCH** PETROLEUM COMPANY

(N.V. Koninklijke Nederlandsche ¿ Petroleum Maatschappij) Established at The Hague, The Netherlands

### INTERIM DIVIDEND 1976

The Board of Directors and the Managing Directors of the Company have declared an account of the expected total dividend in respect of the year 1976, an interim dividend amounting to Netherlands Guilders.

4.50 per share on its outstanding shares of 20 guilders par value.

A. On the Bearer Shares

(i) This interim dividend will be psyable against surrender of coupon No. 160 on or siter 28th September, 1976 at the offices of N. M. Rothschild & Sons Limited, New Court, St. Swithin's Lane, London EC4P 4DU on business days between the hours of 9.30 a.m. and 2 p.m.

Payment will be made in stating at the buying rate of exchange current in Amsterdam at 2 p.m. on 21st September, 1978, in the case of coupons presented on or before that date, or on the day of of coupons presented on or perpet ties date, to on the day of presentation in the case of coupons presented subsequently. In view of the fact that Natherlands guilder funds are being provided by the Company for payment of this dividend, the usual foreign exchange commission will be deducted from the starting proceeds. Coupons must be accompanied by a presentation form, copies of which can be obtained from N. M. Rothschild & Sons Limited, and the face of each coupon must bear the stamp or other indication showing the name of the presenter.

Coupons must be left for an appropriate period for examination and must be handed in personally, Coupons cannot be paid through the

in the case of shareholders not resident within the Scheduled Temtories the paying agent may, at the request of the Authorised Deposi-tary presenting the coupons, pay the dividend in a different currency. Information in this respect will be supplied by the paying agent upon

Natherlands dividend tax at the reduced rate of 15 per cent will be

(a) United Kingdom income tax has also been deducted; (b) Coupons are presented an behalf of residents of the United States of America, Austria, Belgium, Canada, Denmark, Figland, France, Ireland, Japan, Luxembourg, Natherlands Antilles, Norway, South Africa, Spain, Sweden or West Germany, provided they lodge the appropriate declaration form.

fred other cases Netherlands dividend sax of 25 per cent is to be

deducted.

(b) On 2001, September, 1976, this intering desidend will september to the payment with september to the contract whose interior sheets were in the shares whose introduction sheets were in the close of business on 17th September, 1976. Such payment will be made through the medium of N. M. Rothschild & Sone I miled after receipt by them of a drill complete CE DMdeth. Sons Limited, after receipt by them of a duly completed CF Dividend

Where appropriate, the usual affidavit certifying non-residence in the United Kingdom will also be required if payment is to be made without deduction of United Kingdom Income tax:

Where under the double tax agreement between the United Kingdom and the Netherlands 15 per cent Netherlands dividend tax has been withheld, the 15 per cent Netherlands tax is allowable for a resignat of the United Kingdom as a credit against the United Kingdom income tax at the reduced rate of 20 per sent instead of at the Basic Rate of 35 per cent represents a provisional allowance of credit at the rete of

MARINE

W IK IN

On 23rd September, 1976 the sterling amount of the dividend will be fixed on the basis of the sterling/guilder rate of exchange current in Amsterdam on that date.

The record date will be 4th October, 1976; shereholders registere at the close of business on that date will be entitled to receive the

On or before 27th October, 1976 dividend warrants will be posted by the transfer agent, Algemene Bank Nederland N.V., Amsterdam, to shareholders registered in their books on the record date.

From the dividend on the registered shares Netherlands dividend tax of 25 per cent has also to be deducted. Where under the relevant tax convention shareholders are entitled to a reduction of the Netherlands dividend tax, this can only be effected through a request for a partial refund of the tax withheld on the appropriets tax affidavit. A further annuncement will be made as soon as possible after 23rd September, 1976 giving the rate of exchange, the amount of the displand in sterling per share and the amount of the 25 per cent Netherlands dividend tax

20th September, 1976 ROYAL DUTCH PETROLEUM COMPANY

## Coal Board to spend £1.3m. on Hopton pit

Stafford.

The pit is expected to produce 2m. tons of coal a year and spending on it has reached £1.3m. Bore holes and seismic exploration has accounted for £1ml of the total. The Coal Board has yet to apply to Stafford the product of the West Germans it is stand is a potential customer or to gape.

This, the book trade's biggest "Things were easier in former children's books.

The pit is expected to produce 2m. tons of coal a year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and 3 year and planning permission. Mr. Ray Hunter, the NCB gates.

## raise snags

By James McDonald

humber of health visitors and home nurses has been disclosed in official figures. These deficiencies must put into question the adequacy of the 6 per cent growth rate for these staff advocated by the Government, the National and Local Government Officers' Association says

to-day. Criticising the Government Criticising the Government paper Priorities for Health and Personal Social Services in England and Wales, NALGO says that Department of Health standards "there is a shortage in England and Wales of 9,346 health visitors and 7,996 home nurses (at September 30, 1974) against required establishment strengths of 16.398 and 19,678 respectively — deficiencies of about 50 and 40 per cent."

Added to this, living costs for American context, but Monstall standards the position and wales of 19,346 the Fair's organisers believe that, in part, it represents a crusade to encourage reading in a television age.

However, the foreign exhibitors are reflected would rather not come here, a night, while plusher accombined the visitor kind of success some people were back DM150 (£34.50). A snack seeking.

The exhibitors, many of (£4.60).

However, the foreign exhibitors in a different light. Those from the about 50 and 40 per cent."

In Scotland the position is less a meeting place. It is a meeting place. It is a cutting their coats to suit their vide an answer.

about 50 and 40 per cent."

In Scotland the position is less clear, but NALGO claims that there is a shortage of at least S54 staff. "The total staffing establishment should be 3,817."

The union will express concern over the staff shortage at the next meeting of the Nurses increasing clash of interests. The

## The financial strength of Merrill Lynch

## How it can help you meet your financial needs worldwide

As of June 25, 1976, Merrill Lynch had equity capital of over  $S_2^1$  billion. That's more than twice the capital of the next largest U.S. securities firm. But Merrill Lynch is a lot more than a securities firm.

We're also bankers to the world's bankers and to many of the world's largest corporations. In 1975, we managed over \$26 billion of public and private financing worldwide.

bankers to six of the nation's 10 largest banks - including the three largest. Last year, we managed the largest inter-

national underwriting in history for a Japanese

In the United States, we're investment

firm - a \$100,000,000 issue. We were a leader in raising capital in the U.S. for all kinds of international issuers.

In Europe, we recently managed a Eurobond issue that raised \$50,000,000 for Britain's largest bank and we were a leader in Eurobond financing for U.S. and international issuers.

Well managed assets

فكنامن اللحم

We have the capability to manage financing of this magnitude in part because we have

well-managed and extensive resources. For example, Merrill Lynch has no longterm debt. And our working capital is invested to facilitate normal business - not to speculate for our own account.

Along with this financial stability, we offer unmatched international placing power.

Our network of branches, subsidiaries and affiliates gives us access to literally thousands of institutions and to millions of investors. We also offer impressive trading capabilities

in stocks, corporate bonds and government issues. And we offer the assistance of a \$6 million a year securities research operation.

## The British Electric Traction Company, Limited

## Sir John Spencer Wills forecasts a record year

John Spencer Wills, which has been circulated with the Report and Accounts for the year ended 31st March 1976:-

## Accounts

The Accounts show a pre-tax profit for the year ended 31st March 1976 of £42.06 million, compared with £37.75 million for the previous year. Although we have not achieved a return to the record level of £45.92 million reached two years ago, the results are better than we could have expected this time last year when inflation was running riot and business confidence generally was

Contributions towards the partial recovery came from Redif-fusion, whose subsidiary Redifon produced record results, Advance Laundrics, Boulton & Paul, where there was a welcome upturn in profits after the substantial setback experienced last year, United Transport and Canadian Motorways.

Against the foregoing performances have to be set the losses which continued to be incurred by Murphy Bros, and Humphries Holdings, and the cost of financing Wembley Stadium's building

development programme. Twelve months ago, particular attention was being paid to companies' cash positions and this led me to comment on the satisfactory financial position of the B.E.T. Group. The subsequent improvement in the position then outlined is reflected in this year's Consolidated Balance Sheet. Bank borrowings and loan capital at £80.6 million are £7.2 million less than at the end of the previous year. Against this indebtedness there is cash of £14.2 million (excluding £6.8 million held in Rhodesia), and general investments, virtually all of which are quoted securities, valued at £47.5 million compared with £27 million twelve months earlier. Our net borrowings at 31st March this year were, therefore, £18.9 million - a reduction of £28.8 million compared with twelve months earlier.

The latest valuation of the general investments, made at the end of July, showed them to be worth £46.5 million.

### **Printing and Publishing**

Argus Press Holdings improved its 1975 profit, before tax, from the £335,000 of the previous year to £436,000. Adverse economic conditions particularly affected the volume of situations vacant advertising in the company's local newspapers in Surrey and South London, but this was more than counterbalanced by improved performance and expansion of the mag-

azine publishing interests. Electrical Press, which in 1975 extended its weekly newspaper coverage north of London, raised its profits from the £176,000 of the previous year to £190,000.

### Advance Laundries

Last year I reported that pre-tax profits for 1974 at £1,659,000 showed a modest improvement of £100,000. It is gratifying to be able to report that, for 1975, a pre-tax profit of £2,545,000 was achieved, an increase of £886,000 on the 1974 results.

Against the steady background of the Towelmaster service, which continues to do well, the new Airmaster air freshening service and the Dustmaster mat hire service made further satisfactory progress and increased their contributions to the group's

Linen and garment hire services have also held their own surprisingly well considering the current economic conditions and the The results for the current year to date show an improvement on

those for the corresponding period of last year but we cannot expect the overall rate of progress in 1975 to be repeated in 1976.

### **Humphries Holdings**

On the surface, Humphries Holdings appeared to perform as poorly in its year to 31st March 1976, as it did in the previous year when a loss, before tax, of £834,000 was incurred. Analysis of the year's figures reveals, however, that the loss, before tax, of £832,000 included redundancy payments of £321,000; there were

no such payments in the previous year.

The dominant factor in 1975/76 was the loss incurred by Humphries Film Laboratories of £771,000 which included the above-mentioned redundancy payments. A drastic reorganisation of this company is being carried out which should in due course be reflected in a return to profitable operation.

Filmatic. De Lane Lea Music and the two manufacturing subsidiaries, Photomec and Opsec, earned total profits of some £359,000 but these were offset to the extent of £326,000 by a loss incurred by De Lane Lea, which operates sound studios serving the film industry, and a net loss on the operations of the Mole-Richardson subsidiaries.

management believes that when the accounts for the current year are presented they will show a marked improvement.

### United Transport

The pre-tax profits of the United Transport group for the year 1975, at £12,120,000, were again a record, being £612,000 better than the results for the previous year.

The operating profits of the overseas companies at £9,806,000 were a gratifying achievement under difficult trading conditions. In the United Kingdom, where the pre-tax profit rose by 25 per cent, the improvement was attributable to increased contributions from the specialised transport and manufacturing activities. On the overseas side, the passenger companies in East Africa did well and the freight and passenger operations in Malawi had a

most successful year. In South Africa, the negotiated sale by United Transport Overseas of 25 per cent of its transport interests in that country to the South African International Life Assurance Company (SANLAM), to which I referred last year, was completed in October 1975. The year was one of record profits in South Africa and, with its new partner, United Transport Overseas is well placed to undertake further expansion.

The freight transport and forwarding operations in Europe were severely affected in 1975 by the downturn in business activity but, with the recent improvement in the business climate on the Continent, the 1976 results to date are encouraging.

The impact of recession, and the timing of recovery therefrom, in different countries, and in activities within individual countries, has produced conflicting trends in the present year's trading results. The improvement and recovery in many areas should, however, ensure that United Transport's overall results for 1976 do not differ materially from those for 1975.

### Canadian Motorways

Canadian Motorways had a most successful year, increasing its pre-tax profit by 41 per cent from the £383,000 earned in 1974 to a record £1,243,000.

Towards the end of 1975, negotiations were concluded for the acquisition of Carson Transport, an operation based in Vancouver and serving the area in British Columbia northwards to Prince George and Prince Rupert, and linking that area with the Prairie Provinces. This extension of the company's area of operations will strengthen its profit potential.

### Murphy Bros.

In the year to 31st December 1975, Murphy Bros. incurred a loss of £3,239,000. That the loss showed an increase rather than a decrease on the previous year's loss of £2,760,000, was due mainly to the fact that, with the end of the company's major loss-making contracts in the United Kingdom in sight, it was decided to provide for the estimated losses up to the end of these contracts, even although the work did not finish until early in 1976. In addition, further provisions had to be made for the escalating costs of restoration of the company's old coal sites; this work will also be finished within the current year.

For Murphy Bros.' principal activity, opencast mining for coal, there would appear to be a good market for the foresceable future and, with revised contract terms which allow for the escalation of costs on both mining and eventual restoration of sites, the main hazards of the recent past have been reduced. The problems of the German civil engineering subsidiary have yet to be satisfactorily resolved but, as regards its United Kingdom operations, Murphy Bros. is expected to return to profitability in the current

### **Boulton & Paul** The pre-tax profit for the year to

31st March 1976 is up from the previous year's £1,579,000 to £3,345,000. This is a welcome recovery but profits are still below the 1973/74 record figure of £5,096,000. Joinery production showed an increase of 50 per cent on the previous year's figure and steel construction achieved its best-ever results; the other sections of the business also improved on their 1974/75 results. in addition to the two major activities of joinery and steel construction, Stephens & Carter and the Dutch subsidiary, Bijstede, both of which manufacture ladders and supply ac-

The following are extracts from the Review of the Chairman, Sir Humphries Holdings has still not been put to rights but the group's cess equipment, enjoyed excellent years in spite of the difficult. Owing to the depressed state of the construction industry, conditions prevailing in the construction industry both at home Grayston, which has a widespread business in the hire of cranes, and on the Continent. The Aluminium Windows subsidiary general plant and scaffolding, suffered a decline in demand which st result to date: the dearth of large construction iobs could, however, affect this company's order book.

Boulton & Paul takes the view, now endorsed by Government announcements of cutbacks in construction projects, that in two of the fields in which it is involved, steel construction and aluminium windows, the market has yet to touch bottom. On the other hand, joinery and the remaining activities have started the new financial year well and there is the possibility that Boulton & Paul's overall profit for the current year will show an improve-

### Reclamation and Disposal

In 1975, Reclamation and Disposal suffered a pre-tax loss of £112,000 compared with a loss of £218,000 in 1974. The year under review was the first full year of operation of Re-Chem International's industrial waste treatment plants at Pontypool, in South Wales, and Roughmute in Scotland. Re-Chem International, where progress towards the establishment of a profitable operation has been affected by technical troubles, as so frequently happens in the early stages of a new development, also experienced difficult trading conditions; its losses again reflected the severe competition from the cheaper, but potentially hazardous, alternative disposal facilities offered by tipping on land sites. Unfortunately, economic considerations have continued to hold back the implementation of the Control

The results of Biffa Holdings, Reclamation and Disposal's other: subsidiary, which is engaged in general waste disposal and the supply of building aggregates, showed a marked improvement in spite of difficult trading conditions, and 1975 was a record year for the company.

### Rediffusion Television

The pre-tax profit of Rediffusion Television for the year ended 29th July 1975, including the whole of the profit of Tharnes Television for its year to 30th June 1975, was £6,500,000, compared with £7,467,000 for the previous year. The reduction was, as had been forecast, due to the adverse effects of the economic situation on the operations of Thames Television in its year to 30th June 1975. The profit, after tax and minority interests, of Rediffusion Television, which has a 50 per cent interest in Thames, was £2,329,000 compared with £2,564,000 for the previous year. Thames Television's advertisement revenue improved considerably in 1976, and the company's profit for the year ended 30th June 1976 is expected to be substantially better than that for its year to end-June 1975. This improvement in profit will be reflected in Rediffusion Television's accounts to 29th July 1976, which will be consolidated in B.E.T.'s accounts for the current year.

### Rediffusion Holdings

Rediffusion Holdings incurred a pre-tax loss of £231,000 in the year to 31st March 1976, compared with a profit of £468.000 in the previous year. This loss is attributable to the substantial increase in interest charges incurred by one of its subsidiaries, Wembley Stadium Limited, in connection with the financing of its major building development programme. Building work at Wembley continued throughout the year on the

new conference centre, office block, car parks and the construction of overhead walkways leading from the Empire Stadium. The conference centre and the office block are due to be completed before the end of 1976. The confer-

ence centre is creating widespread interest and has already attracted a large number of advance bookings. Rediffusion Holdings' other main operating subsidiary, Walport, which provides filmed entertainment and closed-circuit television programme services for ships at sea, had another successful year, and achieved a considerable increase in its turnover and

### **Plant Hire**

J. D. White achieved a record profit of £1,202,000, an increase of £274,000. The company continues to increase its share of the hire market for large capacity cranes.

December to March. Nevertheless, a record pre-tax profit of £1.857,000 was achieved. As in the case of J. D. White, the demand for cranes remains good but hire rates are far too low.

downturn of £325,000 in Eddison Plant's pre-tax profit of £1,036,000 for its year to 31st December 1975, is no reflection on the company's management. Turnover is derived mainly from the hiring out of fork-lift trucks and 'non-operated' building and civil engineering plant and equipment, both of which sectors were affected by lower than normal demand.

For the current year, the three plant hire companies are expected to earn aggregate pre-tax profits very similar to the £4,095,000 earned in 1975/76.

### Rediffusion

For the year to 31st March 1976, Rediffusion's profit, before tax, increased from the £14.36 million earned in the previous year, to

The television set business in the United Kingdom produced a marginal improvement in profit, in the face of conditions which discouraged growth; the improvement would not have been possible without an intensive drive to reduce costs, which was maintained throughout the year. The effects of economic recession upon the industry were accentuated by Government intervention, in the form of controls and discriminatory taxation, which added severely to costs. There was eventually a reduction from 42 weeks to 26 weeks in the compulsory initial payment on hiring and hire purchase transactions in December 1975; but it was not until after the company's year-end that the punishing 25 per cent rate of VAT affecting television set business was reduced to 12½ per cent - which compares with the standard rate of VAT

Outstanding results were achieved by Redifon, operating in the electronic capital equipment field, which for the first time contributed over 20 per cent of Rediffusion's total profit. One of Redifon's constituent companies, Flight Simulation, again took the major share of world orders for airline flight simulators. The highlight of its year's trading was an order for a device to simulate the in-flight refuelling of the B52 bomber - the first direct order to be placed with Redifon by the U.S. Air Force. Redifon Computers (formerly Redifon Electronic Systems) is meeting with great success. Its output was up by 70 per cent in the year and profits were trebled.

The group's operations abroad continue to be overshadowed by losses incurred by the new television station in Hong Kong, where there are now three commercial stations competing for audiences. However, Rediffusion believe that their Hong Kong subsidiary has now become a first-class television broadcasting company which will win and maintain a major share of the

available audience, Rediffusion's operations in other parts of the world generally produced satisfactory results.

In South Africa, Barlow Rand and Rediffusion have merged their related interests into a new company called Telarama-Rediffusion Holdings, in which Barlow Rand has a 51 per cent controlling interest, and Rediffusion and Standard Bank each hold 24.5 per cent. The new company has taken over the "Telarama" television set marketing business which Barlow Rand started in partnership with Rediffusion in 1975, and the business of Rediffusion's former subsidiary specialising in cable-television installations in hotels and blocks of flats.

### The Outlook

Trading under present economic conditions remains far from easy. Recently, there have been signs of some recovery in sectors of the economy, particularly manufacturing industry, but the rate of inflation, although it has been brought down from the crippling level of twelve months ago, is still running at an uncomfortably high rate.

Even so, our results to date are encouraging and profits for the whole year should exceed the record of £45.92 million established in 1973/74. By how much we may exceed that record will depend upon how the economy fares during the next seven months.

The Annual General Meeting of The British Electric Traction Company, Limited will be held on 14th October 1976, at the Connaught Rooms, Great Queen Street, London, W.C.2.

Copies of the Report and Accounts, containing the Chairman's Review, can be obtained from the Secretary ( 1 f ), Stratton House, Piccadilly, London WIX 6AS.

## WHY A MULTI-MILLION POUND INDUSTRY IS COMING ASHORE IN LONDON.

The value of the world offshore industry has now reached the £15.billion mark. And the North Sea is the most prolific offshore area in the world after the Gulf. The total number of oil rigs there is still above forty. And the largest steel structure ever built - twice the size of the Eiffel Tower - has been installed in the North Sea this year.

Current exploitation programmes during the next three years will push U.K. production near to the 150 million tons a year mark by 1980. And this means that Britain will be self-supporting in oil and gas by the early 1980's.

Already London is recognised as the offshore capital of the Eastern Hemisphere, which is why London's Olympia will host the World Offshore Exhibition and Conference from October 4th-7th 1976.

The Exhibition will cover the latest developments in offshore equipment, materials and services, as well as being a forum for new ideas in technology and practice.

Hundreds of companies will exhibit products covering all aspects of the offshore industry, including: casing, production platforms, tubes, valves, pumps, compressors, paint, cathodic . protection, supply boats, cranes, derricks and

To complement the Exhibition, the World Offshore Conference is being held at the Royal Lancaster Hotel, London, on October 5th and 6th,

Some 40 speakers - all world authorities in their respective fields - will present papers on exploration, supply, production and research. Key speakers and topics include:

Peter Kelly, Director, Long-Term Co-operation, I.E.A.:

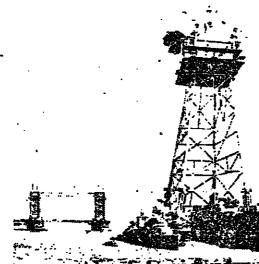

"World Offshore Activity".

Donald A. Logan, CMG Delegation to U.N. Law of Sea Conference:

"Sovereignty Problems and World Offshore Development".

Quentin Morris, Group Financial Controller.

British Petroleum Ltd.: "Offshore Exploration and Development Costs", E. Shannon, President, Santa Fe International: -- "Host Governments, Operating Companies and

Contractors". H. R. Warman: "World Oil and Gas Production".

Giuseppe Bacoccoli, Petrobras: "Brazilian Offshore Prospects".

Leslie Bitner, Taywood-Santa Fe: "Prediction and Control of

Future North Sea Development Costs". M. G. Brigham,

Halliburton: "Drill Stem Testing from Floating Vessels". Dr. E. Edelmann, Prakla-

Seismos: "New Developments in Offshore Seismic Techniques". Paul Holbrook, Gaffney, Cline and Associates Ltd.: "Prospects for the Asian

Pacific Region". K. J. Jameson, BP Petroleum Development Ltd.: "Aspects of Tethered Buoyant Platform Systems Development".

R. D. Koch, British Petroleum Co. Ltd.: "Production Drilling on the Forties Field". Sverre Lund, Statoil:

"Pipelines Across the Norwegian Trench". Dr N. Prasad, Chairman, Indian Oil and Natural

Gas: "The Bombay Paleohigh". T. S. Carter, N. L. Baroid Petroleum Services: "Drilling Fluids for Offshore Programmes".

M. A. Taylor, Manager, Protech International (UK) Ltd.: "Cost Effective Gas and Oil Gathering Systems - A Computer Approach".

World Offshore 1976, is being organised by Fairs and Exhibitions Ltd., the international company that has organised successful trade fairs throughout the world.

I am interested in attending the World Offshore Exhibition. Please send me further details.

## Mr. John King reports:

Since 1968 the Company has undertaken an extensive programme of diversification with the specific aims of reducing its reliance for profitability upon the needs of the power generation industries and improving overall the return on funds employed. Much progress has been made towards the achievement of these aims and the effects of the latest major changes in corporate structure which occurred in 1975 are

now to be seen in the trading results.

The financial strength of the Company has grown accordingly and it is well able to face the current problems in its traditional business caused mainly by the lack of orders from the power generation industry. In the current year, turnover of the Power Engineering Division which has yet to suffer the full impact of this decline in orders, will amount to between 15 per cent and 20 per cent of the consolidated total.

Trading results

The unaudited consolidated accounts for the half rear ended 3rd July 1976 show a turnover of £294.7 million (1975: £164.8 million) and a profit before tax of £15.178.000 (1975: £6.175,000). The current year's figures benefit from the inclusion of American Chain & Cable Company Inc (ACCO) which, on a turnover of £97.4 million, carned a profit before tax of £5,219,000 in the first half of 976. Excluding currency gains, the consolidated turnover and profit before tax of the Company as constituted before the acquisition of ACCO were respectively 19.7 per cent and 23.5 per cent higher than in the corresponding period of 1975. The increase in turnover reflects higher sales in

each of the operating groups. Profits were also higher in every operating group with the exception of the Construction Equipment Group whose results, while good, were below the record land of fact trees. In the International Construction level of last year. In the International Group, relatively better results were reported by Claudius Peters AG and Babcock Australia-Holdings Limited, but the improvement in profitability of the South African company. anticipated in the review of operations given in nuncipated in the review of objections given in the last annual report, should occur later than previously expected. The results for the current year of the Mexican companies will be adversely affected by the decision of the Mexican Government on 1st September 1976 to abandon the fixed parity of the peso with the US dollar. No adjustments have been made in the half-year's account to previously effects of accounts to anticipate the still uncertain effects of the change in parity, but it is considered that such adjustments as may be necessary will not be material in relation to the current year's profits of

the Company.

The profit before tax reported by ACCO was nearly 36 per cent higher than in the first six months of 1975. The increase was attributable to a significant reduction in the losses of certain North American activities, which have been unprofitable in recent years, and improvements in the result; of other North American operations, particularly those serving the automobile

industry.

In accordance with the Company's accounting In accordance with the Company's accounting policy, certain currency gains are dealt with through the profit and loss account and the figure for investment and other income includes such gains amounting to £2,994,000 (1975: £163,000). Trade investment income in the first half of 1975 included dividends from Deutsche Babcock & Wilcox AG (£822,000) and Babcock-Hitachi KK (£52,000) but in 1976, following the sale of the investment in Deutsche Babcock & Wilcox AG, no further dividend income arises and in the case of Babcock-Hitachi KK, which is now an associated company, the appropriate share of its profits is brought into appropriate share of its profits is brought into account on an equity basis.

Investments

Since the last annual report the Company has made a number of acquisitions, the total cost of which amounted to £5.1 million. The outside interests in ACCO, which at the start of the year accounted for 8.6 per cent of its equity, have now been acquired and it is now a wholly owned subsidiary. In May, Triplejay Equipment (Pty) Limited acquired the whole of the share capital of Potain (Pty) Limited, a South African company engaged in the design and construction of tower cranes. In August, the whole of the share capital of B & F Carter & Co Limited was acquired from BICC Limited. This company, which is located in Bolton, designs and manufactures wire machinery and provides the necessary facilities for rationalising the operations of Babcock Wire Equipment Limited within the General Engineering Group. At the beginning of September negotiations were completed by Claudius Peters AG for the purchase of the whole of the share capital of Kroll GmbH, a company based in Hamburg operating as contractors in the construction of liquid bandling installations for the oil and chemical industries and as designers and manufacturers of road tankers for the transportation of mineral oil products. Agreement has also been reached with the parties concerned to purchase the minority interests in Babcock & Wilcox of Africa (Pty) Limited and Bailey Meters & Controls Limited.

Capital expenditure on fixed assets amounted to £7,3 million. In addition, the loan of £962,500 advanced by the Department of Industry in connection with the acquisition of Whipp & Bourne (1975) Limited, has been repaid. The Company's liquid position remains strong and ample resources are available to meet foreseea demands for finance, including working capital

**Power Engineering Division** In previous statements I have drawn attention to the potential lack of future work in this division. Since then there has been a further worsening of the position as the CEGB has indicated that no new conventional power station orders will be placed before 1980, that is two years later than previously announced, and a further delay seems inevitable before orders for new nuclear plants

are awarded. In the 1980's we believe there should be enough business in the United Kingdom to support an efficient boilermaker. The Company operates two factories in Scotland, the facilities at Renfrew being the best in Britain for the classes of work involved. It is not our wish to reduce the scope of these operations but, if they are to overcome the short term crisis, sufficient power generating work must be secured to support the continuing employment of our team of highly experienced and skilled personnel.

The Company has been a major supplier to the power generation industry and has supported successive government programmes by making significant investments in skilled manpower, plant and equipment to meet the fluctuations in demand for generating plant and to provide components for the various nuclear systems which have been adopted. No company in the worldwide power generation industry has operated a viable business without a domestic market in which there has been a reasonable continuity in the rate of ordering and stability in the types of system required. It follows therefore that monopoly buyers and the government agencies that control them must have a special agencies that control them must have a special responsibility to the industries that serve them. The Company is not seeking government "hand outs" but a clear statement of intent, both as to the type of equipment and the rate of ordering intended. If the commitment which follows such a declaration can support a viable business, then we will continue to pursue it energetically with

the appropriate investment of resources.

The Department of Industry has been aware of this situation and discussions with them have taken place over a long period. Since the heginning of 1976 talks about planning agreements and the more recent NEDO industrial strategy exercise have both emphasised the fundamental problems in the process plant industry. As a result of these discussions and representations from many other quarters
Mr. Vurley, Secretary of State for Industry,
announced on 15th June 1976 that the
boilermaking and turbo-generator industries
were to be studied urgently by the Central
Policy Review Staff with recommendations to be

put forward by the end of October.

There is no way of knowing the likely outcome of this study nor the eventual decisions of Government but, with the workload in the engineering departments decreasing, there will have to be redundancies declared in the near future to become effective by the year end unless new orders are obtained. In parallel with our new orders are obtained. In parallel with our discussions with Government we have throughout the year kept this division's employees informed of the situation, but in view of the uncertainty prevailing we felt it necessary to advise them during August of the potential year end redundancies.

Current trading prospects The value of all orders on hand at the end of June amounted to £472 million, compared with £493 million at the end of 1975. Orders
outstanding for exports and on our overseas
companies totalled £275 million and since June
our South African company has secured an order
for the extension of the Matla power station for
ESCOM valued at £100 million. This contract is the largest we have ever been awarded and covers the design, engineering, manufacture, construction and commissioning of three coal-fired 600 MW boilers and ancillaries.

Your board expects that the workload on most units for the remainder of the year should continue at a similar level to that in the first six months, and therefore the trading profit for the second half should be of the same order as that

Interim ordinary dividend Your board has declared an interim ordinary dividend of 1.0556p per share payable on 25th October 1976 to shareholders registered at the close of business on 20th September 1976. This dividend represents one half of the maximum annual rate of ordinary dividend permissible under current legislation.

with Iceland and Norway.

last and most important instal- the charges to be made.

The official reason for Mr. Jose Medeiros Ferreira's visit bere is to sign two new trade pro-

power."

Coalition was an underlying theme at the Llandudno Assembly all week. But it was only Liherals when Mr. Steel came with Mr. Steel's forceful winding to the sensitive issue of coalition. But their placard demonstrate surfaced and was accepted stration was overwhelmed by objective.

Mr. Steel's torms, which he gates.

Jeremy Thorpe's resignation.

There were the expected protestal and the composition of the support for the idea of a more broadly-based government. The stranglehold of the two which party the Liberals would cracy of government, trade which party the Liberals would cracy of government, trade which party the Liberals would cracy of government, trade shown for a coalition. The more broadly-based government. The stranglehold of the two which party the Liberals would cracy of government, trade shown for a coalition. The more broadly-based government. The stranglehold of the two which party the Liberals would cracy of government, trade shown for a coalition. The distribution is a sensible and unifying the cheers and foot-stamping of the cheers and foot-stamping of the majority of the 1.600 delemants of the sensitive issue of coalition. The distribution is a standing we are in being as a chimera. The claim movement when the party to form a government trade which party the Liberals would cracy of government. The major parties and the bureautive score is major parties and the bureautive score of the stranglehold of the two which party is standing of government. The major parties and the bureautive score is major parties and the bureautive score is stranglehold of the two which party is stranglehold of the two which party is major parties and the bureautive score is stranglehold of the two which party is stranglehold of the two which party is stranglehold of the two which parties and the bureautive score is major parties and the bureautive score is major parties and the bureautive score is major parties and the bureautive score is major parties and the bureautive score is major parties and the bureau

Mr. Steel gave both major

power was to be ready to join The coalition formula, all carefully worked out policy on a coalition after the next though vague and utterly dependent on the outcome of the Liberals. Mr. Steel said, "must dependent on the outcome of the Liberals must make a twofold appeal at the next formula, all carefully worked out policy on Callaghan and Mrs. Thatcher indicating their refusal to support the Liberal call that election, was a twofold appeal at the next of the Speaker's Conference.

The new leader's strategy means the Liberals must make a twofold appeal at the next of the Speaker's Conference.

Wr. Steel approached the explosive coalition issue by saying for support for the idea of a Liberals alone could not break two.

Condition was an underlying. There were the everythed were the supported for support for the idea of a Liberals alone could not break two.
